QUESTION 7 (LO1 AS1)

Analyse the characteristics and importance of entrepreneurs in the economy.

INTRODUCTION

An entrepreneur is an ambitious and enterprising person who takes the initiative to start a business enterprise coordinating all other factors of production. $\checkmark \checkmark \checkmark$ (Accept any appropriate definition)

BODY Characteristics

1. Take the initiative $\checkmark\checkmark$

- They take the initiative in any established enterprise. ✓✓
- They are the driving force behind production. \checkmark
- They also introduce new products and new techniques to the market. ✓✓
- They are dynamic leaders with creative abilities. √√
- They recognise and identify business opportunities. ✓✓

2. Organise production/Combines other factors of production $\checkmark\checkmark$

- Factors of production are brought together for production activities. ✓✓
- These resources must be used efficiently to reduce wastage. ✓✓
- They have a broad interest in many things and are open to new ideas and suggestions. ✓✓
- They are able to negotiate and motivate other people. ✓✓

3. Take risks √√

- Goods are produced for future use by unknown consumers. ✓✓
- Buy at certain prices and sell at uncertain prices. ✓✓
- Sometimes income may not cover costs, and that risk will be taken by the entrepreneurs. ✓✓
- They can deal with any uncertainty and takes calculated risks. $\checkmark\checkmark$

4. Makes decisions $\checkmark\checkmark$

- On what to, where and for whom to produce. ✓✓
- Also decide on the quantity and quality. ✓✓
- Also make decisions on the type of business. ✓✓
- They have a clear understanding of what they want to do. $\checkmark\checkmark$

5. Have a need to achieve $\checkmark \checkmark$

- They have a strong desire to succeed in challenging tasks. ✓✓
- Regard the establishment of new businesses as a sense of personal achievement. ✓√

LISTING TO A MAX OF 10 MARKS (Any 10x2) (20)

(3)

Importance

- 1. Ensure competitiveness ✓✓
- Entrepreneurs create competition by challenging other businesses. ✓✓
- The number of entrepreneurs in the market depends on the profitability. $\checkmark\checkmark$

2. Creates employment ✓✓

- They are important for an economy to grow and create work opportunities for the growing population. ✓✓
- Small entrepreneurs create more job opportunities. ✓✓
- Informal sector creates more jobs than formal sector. ✓✓

3. Improves efficiency ✓✓

- Entrepreneurs with new ideas and technology use resources efficiently. ✓✓
- Efficiency increases profitability which leads to more competition. ✓✓
- They are important for guiding and combining other factors efficiently. ✓✓

4. Creation of wealth $\checkmark \checkmark$

- Entrepreneurs entering the market create new wealth. ✓✓
- They are the driving force in any undertaking. ✓✓

LISTING TO A MAX OF 10 MARKS (Any 10x2) (20)

CONCLUSION

In a market economy, the entrepreneurs take up the challenge of combining the resources and risks associated with it. $\checkmark\checkmark$

QUESTION 8 (LO2 AS1)

Explain in detail the characteristics of a perfect competitive market and conclude your essay by briefly explaining the reasons for imperfect markets.

INTRODUCTION

Perfect market is an ideal market structure which rarely exists in the real world. $\checkmark \checkmark \checkmark$

(Accept any appropriate introduction)

(3)

BODY Characteristics

- 1. Large number of sellers $\checkmark \checkmark$
- A single seller is not big enough to control the market. ✓✓
- There is sufficient competition that no single producer can fix the price of the product. ✓✓
- If any seller tries to charge a higher price than market price, buyers will get it from other sellers. ✓✓
- Sellers in this market are price takers. ✓✓
- One seller cannot change the price by restricting supply. ✓✓

2. Large number of buyers $\checkmark\checkmark$

- A single buyer is not big enough to influence the price. ✓✓
- Competition in the market determines the equilibrium price and quantity. ✓✓

3. Homogeneous products ✓✓

- The products in these markets are homogenous or identical. $\checkmark\checkmark$
- It is impossible to differentiate the product of one producer from that of another. ✓✓
- There is no reason for buyers to prefer the product of one seller to that of another one. ✓✓
- Sellers and buyers compete with one another in terms of the price of the product. ✓✓

4. Perfect information ✓✓

- All market participants have complete and correct information about market conditions. ✓✓
- E.g. market price of the product. ✓✓

5. No collusion ✓✓

Each buyer and seller acts independently from one another and no collusion occur. ✓✓

6. Freedom of entry and exit $\checkmark \checkmark$

- Buyers and sellers are free to enter or leave the market. ✓✓
- There are no legal barriers or restrictions which reduce the free movement of buyers and sellers. ✓✓
- New firms can enter and compete with the existing ones. ✓✓
- Entry and exit costs are minimal. ✓✓

- There is no government interference or control in the market. $\checkmark\checkmark$
- All decisions are left to individual buyers and sellers. ✓✓

8. Perfect mobility $\checkmark \checkmark$

 All the factors of production should be able to move freely from one market to another. ✓✓

LISTING TO A MAX OF 16 MARKS (Any 16x2) (32)

Reasons for imperfect competition

- Specialised small markets with no room for many producers. ✓✓
- Large capital outlay which is out of reach of many businesses. ✓✓
- An enterprise may be the only owner of a scarce resource. ✓✓
- Producers may have copy rights or patents to the product which makes it difficult for other producers to enter. ✓✓
- Technological developments may lead to a supplier having an advantage over their competitors. ✓✓
- Insufficient knowledge of the market conditions. ✓✓

(Any 4x2) (8)

(2)

CONCLUSION

The conditions for perfect competition are very restrictive, so it is hardly surprising that no market meets all the requirements for perfect competition. $\checkmark\checkmark$ (Any appropriate conclusion is acceptable)

(3)

QUESTION 9 (LO3 AS2)

Fully explain the characteristics of developing countries.

INTRODUCTION

Developing countries are identified with the characteristics they display. $\checkmark \checkmark \checkmark$ (Accept any appropriate definition)

BODY

Characteristics of developing countries

1. Low standard of living $\checkmark \checkmark$

- Standards of living in developed countries are low. ✓✓
- It is measured in terms of per capita income. ✓✓
- E.g. inadequate housing, poor health, limited education, etc. ✓✓

2. Low per capita income $\checkmark \checkmark$

- Per capita income in developing countries is low. ✓✓
- They have slower growth of per capita GNI than developed countries. ✓✓
- There is greater unequal distribution of income. ✓✓

3. Greater unequal distribution of income $\checkmark\checkmark$

- The income gap between the rich and the poor is greater in developing countries. ✓✓
- This income gap is referred to as income inequality. ✓✓

4. More poverty $\checkmark \checkmark$

- Majority of the population in developing countries are poor. ✓✓
- People are poor because they earn less than poverty line income. ✓✓

5. Low life expectancy ✓✓

- They also have to battle against malnutrition, disease and ill health. ✓✓
- Because of malnutrition, disease and ill health, their life expectancy is low. ✓✓

6. Low levels of education $\checkmark \checkmark$

- Low standard of living is because of low levels of education. ✓✓
- Adult literacy rate is low in developing countries. ✓✓

7. Low levels of productivity $\checkmark \checkmark$

- Labour productivity in these countries is very low compared to developed countries. ✓✓
- This is because of the absence of factor inputs. ✓✓
- Poor nutrition during childhood restricts mental and physical growth. ✓✓
- These factors contribute to ill-health, disease and worker absenteeism. ✓✓
- Too little money is spent on developing human capital. ✓✓

8. High population growth and dependency burdens \checkmark

- Birth rates are high and death rates are low because of modern medicines. ✓✓
- The average population growth rates of developing countries are higher than developed countries. ✓✓
- Children make up the majority of the population. $\checkmark\checkmark$
- Children and people over the age of 65 depend on the productive population. ✓ ✓

- Developing countries cannot make optimal use of their labour force. ✓✓
- There is a lot of underemployment working for less number of hours or wages. ✓✓
- Most of the unemployed are not able to create employment for themselves. ✓✓

10. Dependence on primary sector $\checkmark \checkmark$

- Majority of the population live and work in the rural areas. ✓✓
- Most of them are engaged in agricultural activities. ✓✓
- Primary sector goods are their main exports. ✓✓

11. Deficient infrastructure $\sqrt{\sqrt{}}$

• All forms of infrastructure are deficient in developing countries. ✓✓

LISTING TO A MAX OF 20 MARKS (Any 20x2) (40)

CONCLUSION

Development strategies applied in developing countries differ from country to country. $\checkmark \checkmark$

	(31 – 45 marks)

QUESTION 10 (LO4 AS4)

Write a detailed essay on the causes and effects of poverty.

INTRODUCTION

Poverty is a condition in which people lack the means to satisfy their basic physical needs. $\checkmark \checkmark \checkmark$

(Accept any appropriate definition)

BODY Causes of poverty

- 1. Root causes $\checkmark \checkmark$
- Colonialism and imperialism exploited colonised land and people of their wealth and power. ✓✓
- Domination, discrimination, segregation, capitalism and apartheid. ✓✓
- 2. Unemployment ✓✓
- The most important reason for poverty is the lack of employment. ✓✓

3. Inadequate infrastructure ✓✓

- Inadequate infrastructure increases the cost of business. ✓✓
- The cost of providing infrastructure is high and unaffordable in most poor countries. ✓✓

4. Lack of resources $\checkmark\checkmark$

Resources are not enough to support the population. ✓✓

5. Lack of social infrastructure ✓✓

- The most important are lack of education and healthcare. ✓✓
- Many poor countries cannot afford to provide education for the young people. ✓✓
- Economic growth and development depends on the quantity and quality of education. ✓✓
- Education will also improve productivity. ✓✓
- Health care includes nutrition, health facilities, social security, etc. ✓✓
- There is inadequate primary health care in poor countries. ✓✓

6. Lack of investment and debt $\checkmark\checkmark$

- Poverty leads to insufficient investment and vice versa. ✓✓
- Investment is essential for growth and development. ✓✓
- Excessive debt is disadvantageous to growth and development. ✓✓

7. Lack of technological progress $\checkmark\checkmark$

- Lack of modern technology in agriculture, manufacture and service industry. ✓ ✓
- Lack of technical skills and investment are the reasons for the lack of technology. ✓✓

(3)

8. Poor governance $\checkmark \checkmark$

- Poor countries have records of poor governance. ✓✓
- Corruption and nepotism are not effectively dealt with. ✓✓
- Budgets, procedures and protocols are not followed properly. ✓✓
- Ineffective or bad policies can also lead to poverty. ✓✓

9. Violence and war $\checkmark \checkmark$

- Violence and war occur to the disadvantage of the citizens. ✓✓
- Resources for education and health care are used for war. ✓✓
- It destroys human lives and infrastructure. ✓✓

LISTING TO A MAX OF 12 MARKS (Any 12x2) (24)

Effects of poverty

- 1. Social effects ✓✓
- Poverty leads to many social problems. ✓✓
- E.g. homelessness, drug dependency, domestic violence, etc. ✓✓
- Pride and dignity are adversely affected. ✓✓
- It also negatively affects mutual respect, tolerance and peaceful coexistence. ✓ ✓

2. Decrease in demand $\checkmark\checkmark$

- It leads to a decrease in aggregate demand. ✓✓
- The unemployed do not have any purchasing power. ✓✓

3. Increase in population \checkmark

- Increase in the number of children as a source of old age financial security. ✓✓
- It is also the result of migration from other countries. $\sqrt{\checkmark}$
- It is also disadvantageous to the environment and employment. ✓✓

4. Decline in productivity ✓✓

- Low income and low standard of living leads to low economic productivity. ✓✓
- Most poor people lack education and skills. ✓✓
- The growing rate of HIV/Aids and absenteeism also leads to low productivity.✓✓

5. Low rate of development $\checkmark \checkmark$

- The need to spend more on social security drains poor countries of their fiscal resources. ✓✓
- Since people are poor, it is the responsibility of the government to provide education, health and other services. ✓✓
- It places heavy burden on government finances. ✓✓

6. Rural-urban migration ✓✓

- Poverty leads to the migration of better trained people from rural to urban areas. ✓✓
- Rural population becomes increasingly impoverished. $\checkmark\checkmark$
- Urban areas grow in an unplanned manner without the services. ✓✓
- It results in overcrowding, crime and other social ills. ✓✓

LISTING TO A MAX OF 8 MARKS (Any 8x2) (16)

CONCLUSION

It is difficult for many poor people to break the poverty cycle because of the lack of opportunities and resources and Poverty leads to more poverty. $\checkmark\checkmark$
