SECTION A: COMPREHENSION**QUESTION 1**

Read the text below from the *DRUM* magazine of October 2012 and answer the questions that follow.

LOSING YOUR MIND?

October is mental health awareness month.
Here we learn more about depression.

In 2001 Thobile Mahlangu divorced her abusive husband. Soon afterwards the 45-year-old mother started having panic attacks. "I didn't know what it was and thought there was something wrong with my heart," she shares.

In spite of these strange feelings, Thobile carried on with her life but found she was becoming increasingly anti-social. "I tried to cope with life and work but knew something wasn't right because I felt tired all the time and I started to even avoid family gatherings and funerals," she says.

It wasn't until 2006 while she was working as an HIV counsellor at Helen Joseph Hospital in Johannesburg that she realised what had been troubling her.

"I was describing the symptoms of depression to some women and I realised that's what I have been going through," she recalls.

Thobile, who now runs a placement agency from her home in Brixton, Joburg, immediately sought medical help and counselling. "Understanding what you're going through helps you cope better," she says, adding that she's on chronic

medication to treat her condition.

Thobile also explained her condition to her kids and gave them pamphlets to read. "Now they're her biggest supporters", she says. "It's not a weakness to take medication every day and it's important not to stop when you feel better."

"Being in denial over needing help makes your condition worse. You deal with it better when you seek help as soon as possible," she adds.

Depression is the most common mental illness and affects millions of men, women and children of all races, cultures and socio-economic groups.

Despite this many suffer in silence and are afraid of how they'll be judged if they admit to a diagnosis of depression, says the South African Depression and Anxiety Group (SADAG)'s CEO, Elizabeth Matare.

"Women often try to be 'super-women'. They want to do all and be all to everyone in their lives", Elizabeth explains.

Read the following passage and summarise the FIVE main points.

- Write in full sentences.
- Use POINT FORM.
- Use your own words. DO NOT COPY SENTENCES AS THEY ARE FROM THE PASSAGE.
- Number your sentences.
- Your summary should be 50–60 words. Count your words and write the total at the end of your summary.

Should you disclose that you are HIV-positive?

1. “Disclosing your status enables you to receive emotional, medical and practical help to deal with the challenges of living with HIV. But disclosing is never compulsory – it’s a choice,” says Sue.
2. Sue adds disclosing your status has many implications, so don’t take that step until you feel ready to face people’s reactions.
3. “Never feel pressurised to disclose. It is your right to keep your status to yourself if that is what makes you comfortable,” she says.
4. HIV-Aids counsellor Innie Mokoena says there are benefits to disclosing your status. “Disclosure removes the load of keeping a secret and helps the person to accept his/her status,” she says.
5. Innie adds that disclosure means that the person has access to medical care and support that they may need. “Sharing your status also helps protect those around you as you will be able to influence them to avoid infection,” she adds.
