COMPETITION CONCENTRATION AND REMOVAL OF BARIERS TO ENTRY

Competition policy is poised to be a key driver of economic reform in South Africa. In March 2022, the Competition Commission briefed the South African Parliament on its Economic Concentration Report.

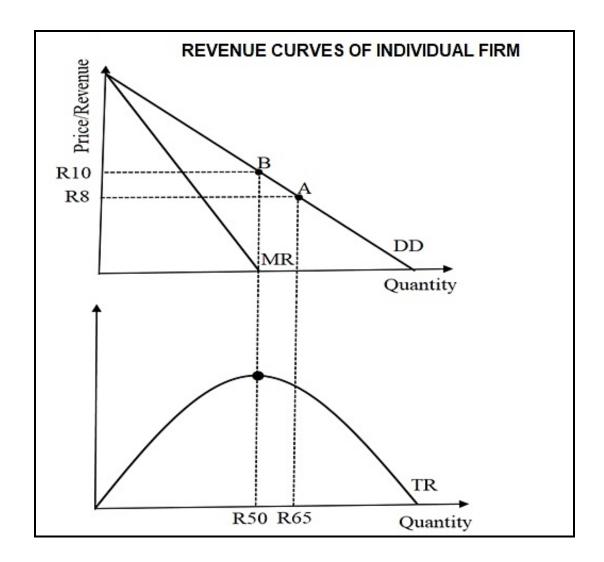

The report highlighted patterns of concentration in the South African economy. It included details on the Commission's power to launch market inquiries into highly concentrated industries and its authority to impose structural remedies on businesses in these sectors. Such remedies are deemed necessary to remove barriers to entry for new participants, primarily SMMEs.

RISING INFLATION BRINGS A STRIKING FALL IN REAL WAGE

The severe inflationary crisis combined with a global slowdown in economic growth – driven in part by the war in Ukraine and the global energy crisis are causing a striking fall in real monthly wages in many countries.

The crisis is reducing the purchasing power of the middle classes and hitting very hard, particularly low-income households.

Global monthly wages fell in real terms to minus 0,9% in the first half of 2022. These placed millions of workers in a dire situation as they face increasing uncertainties.
