MARKING GUIDELINES

MARKS: 150

These marking guidelines consist of 28 pages.

1. SOURCE-BASED QUESTIONS**1.1 The following cognitive levels were used to develop source-based questions:**

Cognitive Levels	Historical skills	Weighting of questions
Level 1	<ul style="list-style-type: none"> Extract evidence from sources Selection and organisation of relevant information from sources Define historical concepts/terms in own words 	30% (15)
Level 2	<ul style="list-style-type: none"> Interpretation of evidence from sources Explain information gathered from sources Analyse evidence from sources Define of historical concepts in context 	40% (20)
Level 3	<ul style="list-style-type: none"> Interpret and evaluate evidence from sources Engage with sources to determine its usefulness, reliability, bias and limitations Compare and contrast interpretations and perspectives presented in sources and draw independent conclusions 	30% (15)

1.2 The information below indicates how source-based questions are assessed:

- In the marking of source-based questions, credit needs to be given to any other valid and relevant viewpoints, arguments, evidence or examples.
- In the allocation of marks, emphasis should be placed on how the requirements of the question have been addressed.
- In the marking guideline, the requirements of the question (skills that need to be addressed) as well as the level of the question are indicated in *italics*.
- When assessing open-ended source-based questions, learners should be credited for any other relevant answers.
- Learners are expected to take a stance when answering 'to what extent' questions in order for any marks to be awarded.

1.3 Assessment procedures for source-based questions

- Use a tick (✓) for each correct answer
- Pay attention to the mark scheme e.g. (2 x 2) which translates to two reasons and is given two marks each (✓✓✓✓); (1 x 2) which translates to one reason and is given two marks (✓✓)
- If a question carries 4 marks then indicate by placing 4 ticks (✓✓✓✓)

Paragraph question

Paragraphs are to be assessed globally (holistically). Both the content and structure of the paragraph must be taken into account when awarding a mark. The following steps must be used when assessing a response to a paragraph question:

- Read the paragraph and place a bullet (•) at each point within the text where the candidate has used relevant evidence to address the question.
- Re-read the paragraph to evaluate the extent to which the candidate has been able to use relevant evidence to write a paragraph.

- At the end of the paragraph indicate the ticks (✓) that the candidate has been awarded for the paragraph; as well as the level (1,2, or 3) as indicated in the holistic rubric and a brief comment e.g.

Level 2 $\sqrt{\sqrt{\sqrt{\sqrt{\quad}}}}$

COMMENT

Used mostly relevant evidence to write a basic paragraph.

- Count all the ticks for the source-based question and then write the mark on the right hand bottom margin e.g. 
- Ensure that the total mark is transferred accurately to the front/back cover of the answer script.

2. ESSAY QUESTIONS

2.1 The essay questions require candidates to:

- Be able to structure their argument in a logical and coherent manner. They need to select, organise and connect the relevant information so that they are able to present a reasonable sequence of facts or an effective argument to answer the question posed. It is essential that an essay has an introduction, a coherent and balanced body of evidence and a conclusion.

2.2 Marking of essay questions

- Candidates may have any other relevant introduction and/or conclusion than those included in a specific essay marking guideline for a specific essay.

2.3 Global assessment of the essay

The essay will be assessed holistically (globally). This approach requires the teacher to assess the essay as a whole, rather than assessing the main points of the essay separately. This approach encourages the learner to write an original argument by using relevant evidence to support the line of argument. The learner will **not** be required to simply regurgitate content (facts) in order to achieve a level 7 (high mark). This approach discourages learners from preparing essays and reproducing them without taking the specific requirements of the question into account. Holistic marking of the essay credits learners' opinions that are supported by evidence. Holistic assessment, unlike content-based marking, does not penalise language inadequacies as the emphasis is on the following:

- The learner's interpretation of the question
- The appropriate selection of factual evidence (relevant content selection)
- The construction of an argument (planned, structured and has an independent line of argument)

2.4 Assessment procedures of the essay

2.4.1 Keep the synopsis in mind when assessing the essay.

2.4.2 During the reading of the essay, ticks need to be awarded for a relevant introduction (which is indicated by a bullet in the marking guideline), the main aspects/body of the essay that sustains/defends the line of argument (which is indicated by bullets in the marking guideline) and a relevant conclusion (which is indicated by a bullet in the marking guideline). For example, in an essay where there are five (5) main points there could be about seven (7) ticks.

2.4.3 Keep the **PEEL** structure in mind when assessing an essay.

P	Point: The candidate introduces the essay by taking a line of argument/making a major point. Each paragraph should include a point that sustains the major point (line of argument) that was made in the introduction.
E	Explanation: The candidate should explain in more detail what the main point is about and how it relates to the question posed (line of argument).
E	Example: The candidates should answer the question by selecting content that is relevant to the line of argument. Relevant examples should be given to sustain the line of argument.
L	Link: Candidates should ensure that the line of argument is sustained throughout the essay and is written coherently.

2.4.4 The following symbols **MUST** be used when assessing an essay:

- Introduction, main aspects and conclusion not properly contextualised

^

- Wrong statement
- Irrelevant statement

- Analysis

2.5 The matrix**2.5.1 Use of the matrix in the marking of essays**

In the marking of essays, the criteria as provided in the matrix should be used. When assessing the essay note both the content and presentation. At the point of intersection of the content and presentation based on the seven competency levels, a mark should be awarded.

- (a) The first reading of essays will be to determine to what extent the main aspects have been covered and to allocate the **content level** (on the matrix).

C	LEVEL 4	

- (b) The second reading of essays will relate to the level (on the matrix) of **presentation**.

C	LEVEL 4	
P	LEVEL 3	

- (c) Allocate an overall mark with the use of the matrix.

C	LEVEL 4	}26–27
P	LEVEL 3

QUESTION 6: THE END OF THE COLD WAR AND A NEW WORLD ORDER

[Plan and construct an original argument based on relevant evidence using analytical and interpretative skills]

SYNOPSIS

Candidates need to explain to what extent the sweeping reforms introduced by Gorbachev in the 1980s had negative political and economic results in the Soviet Union and also resulted in political changes in South Africa.

Candidates need to substantiate their argument with relevant historical evidence.

MAIN ASPECTS

Candidates could include the following aspects in their response:

- Introduction: Candidates need to take a line of argument by explaining to what extent the sweeping reforms introduced by Gorbachev in the 1980s affected the Soviet Union politically and economically and also resulted in political changes in South Africa. They should indicate how they would support their line of argument.

ELABORATION**SOVIET UNION**

- Background - Soviet Union in economic hardships due to the cost of the Cold War and the war in Afghanistan.
- Gorbachev became Secretary-General of the Soviet Communist Party and leader of the government in 1985 at 54 years of age.
- He was not a hardliner and hoped to revive Soviet Union's economy by improving both industrial output and technology, as well as expanding its markets
- He took a big risk of effecting political change, especially for the Soviet Union, known for its hardline Communist stance.
- He wanted to take the Soviet Union out of a weak economic system – due to space and arms race with the USA.
- He introduced the policy of Perestroika (Economic reconstruction) and of Glasnost (openness)
- Glasnost led to criticism of the policy of Perestroika and Gorbachev himself
- Many hardline communists were discontent with policies that became unpopular
- At home he had two types of opponents: hardliners who were opposed to the reforms and liberals who criticized him for not moving fast enough
- The two policies did not support each other as thought but ended the entire system of the Soviet Union
- He lost support at home – Unity of the Soviet Union was at risk and Socialism became under threat
- He commanded a hero status to the West. His personal power and prestige increased. He earned a Nobel Peace Prize in 1990.
- Many underlying differences existed amongst the 15 Republics
- Civil unrests broke out between various groups
- Old form of Nationalism emerged and led to new demand for independence
- He tried to stop the disintegration by proposing establishing a Federation of States – which failed.
- Fall of the Berlin Wall (1989)
- In 1990, several Soviet states including Russia under Gorbachev's bitter rival, Boris Yeltsin, declared their independence
- On 25 Dec 1991, the USSR was dissolved, the Communist Party disbanded
- Each of the 15 Republics became independent and became members of the Commonwealth of Independent states
- The disintegration symbolized the end of the Cold War

SOUTH AFRICA

- The USA and its allies could no longer continue to support the apartheid regime
- The West now put pressure on the NP government to negotiate with the ANC or face continued sanctions
- The collapse of the Soviet Union put pressure on both the National Party government and the ANC to begin with negotiations
- The defeat of the SADF during the Battle of Cuito Carnavale in 1988 spurred the National Party to start negotiations with communists over the independence of South West Africa
- South Africa withdrew from South West Africa – SWAPO won the elections (1990) and renamed it Namibia
- This peaceful transition from white minority rule to Black majority rule in Namibia served as a blueprint for SA to do the same (contributing factor)
- It became evident that the National Party government could not maintain white supremacy rule indefinitely (contributing factor)
- Influential National Party members started to realise that apartheid was not the answer for the development of 'white' economic interests (contributing factor)
- The government started to believe that reform needed to include the development of a strong black middle class which would act as a 'bulwark against revolution'
- The South African government could no longer use the threat of communism to generate Western support
- South Africa could no longer rely on Western backing for its 'anti-communist' stance
- World politics changed and this had an impact on South Africa's apartheid policies
- The apartheid regime could no longer use communism to justify its policy of racial segregation
- The National Party's claim that it was protecting South Africa from a communist onslaught became unrealistic
- De Klerk thought that ANC would be weak and showed his willingness to negotiate with the ANC
- The Soviet Union could no longer support the ANC financially as it was bankrupt
- The Soviet Union would not support the ANC with weapons anymore as it favoured peaceful negotiations
- The ANC was unable to continue the armed struggle against the NP without this military and financial support
- The ANC now also showed willingness to negotiate with NP as an alternative to the armed struggle
- FW de Klerk started to accept that the black struggle against apartheid was not a conspiracy directed from Moscow
- This enabled De Klerk to engage with the liberation organisations to find a lasting solution for South Africa
- On 2 February 1990 De Klerk announced the unbanning of all anti-apartheid organisations and this paved the way for multi-party talks
- These talks ultimately led to democratic elections that were held in 1994
- Any other relevant response
